EDUCATION

New York Code and Design Academy, Philadelphia

Mar, 2017 - Aug, 2017

My first boot camp and really my first taste of Coding. I credit this school with getting the addiction started. Boot camps really do earn their name, this 14 week class was Mon–Fri 10–5pm and forces the students to get sucked into their computers.

Rutgers Coding Bootcamp, New Brunswick

Jun, 2018 - Aug, 2018

After my internship I took some time off to further pursue my education and stumbled upon a coding boot camp that Rutgers was offering. This was even MORE intense then my first and I believe closed a lot of the gaps I felt I had from the first camp..

SKILLS

JavaScript
React
Node.js
MySql
NoSql
HTML/CSS
React Native
Ruby

EXPERIENCE

GamePlan (CoMayers), Philadelphia — *Intern*

Aug, 2017 - Dec, 2018

Working with a Startup company was a very exciting, fast paced experience and not only did I get to work alongside a very talented developer, I was able to view a lot of the business and marketing side of the company. This lens into the actual work a developer was put up against was very eye opening and made me realized even more so that there was much to learn.

Terrafirma, Avon— *Landscaper*

Mar, 2016 - Mar, 2017

Landscaping full time was easily one of the hardest jobs I've work but was very rewarding. I find it relevant to add this job not in a sense that in trained me to work with computers but I worked in a team everyday to accomplish the many goals we had ahead of us. Maintaining a good attitude wasn't just beneficial to yourself but it made everyone's in the team day that much easier.
